 github.com/mekrishna

Software Engineer with 5+ years of experience building scalable web applications using Angular, React, and Spring Boot. Strong in frontend development with experience designing backend services, REST APIs, and integration systems for enterprise platforms. Focused on performance, scalability, and maintainable solutions.

KEY HIGHLIGHTS

- Built multi-tenant fintech platform for payment orchestration across multiple gateways.
- Designed dynamic routing layer and gateway integration framework.
- Developed integration framework and REST APIs for onboarding new payment providers.
- Implemented workflow-driven approval systems for service onboarding and configuration.
- Integrated micro-frontend architecture (Angular + React via Luigi).

TECHNICAL SKILLS

- | | |
|---|---|
| • Frontend (Core): | Angular (16–21), React.js, TypeScript, JavaScript, RxJS |
| • Web Technologies: | HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap |
| • UI & Visualization: | Angular Material, Material UI, Chart.js |
| • Architecture & State Management: | Micro-frontends (Luigi), NgRx / NgXS, Redux |
| • Backend: | Java, Spring Boot, Node.js, REST APIs |
| • Databases: | MySQL, PostgreSQL, MongoDB |
| • Tools & Platforms: | Git, Jenkins, SonarQube, Fortify, AWS |
| • AI & Developer Tools: | GitHub Copilot, Cursor AI, AI-assisted development (VS Code, Antigravity) |

PROFESSIONAL EXPERIENCE

Senior Software Engineer - Comviva

Jan 2023 – Present

- Built multi-tenant fintech SaaS platform for payment orchestration across gateways.
- Developed dynamic routing layer and gateway integration framework.
- Developed REST APIs and backend services for payment routing and gateway integration.
- Implemented real-time dashboards for transaction monitoring and reporting.
- Designed workflow-based approval system for service onboarding.
- Delivered end-to-end features across Angular front-end and Spring Boot backend.
- Used AI-assisted development tools (Cursor, GitHub Copilot) to accelerate development, improve code quality, and streamline debugging workflows.

Software Engineer II - Forrester

Sep 2022 – Jan 2023

- Re-architected legacy system into React SPA.
- Implemented advanced search features with nested filters, recurring options, and sorting to enhance content discovery.
- Built personalized recommendation engine & reusable UI components

Product Development Engineer - Comviva

Jul 2021 – Aug 2022

- Developed frontend modules and backend services for onboarding and approval systems
- Implemented bulk CSV onboarding with validation workflows
- Built activity dashboard for tracking user requests
- Designed role-based access and approval hierarchy systems

Product Development Engineer Intern - Comviva

Jan 2021 – July 2021

- Developed gamified reward features (Spin-the-Wheel, Scratch Cards) to enhance user engagement in a React-based payment platform
- Built responsive UI components and integrated frontend with backend APIs for real-time reward processing

EDUCATION

National Institute of Technology Tiruchirappalli

Master of Computer Application (CGPA of 8.5)

June 2021

Tamil Nadu, India

M.L.T College, Saharsa

Bachelor of Computer Application (80.79%)

June 2018

Bihar, India
